

Layered invitation with  
lined envelope  
Facebook 13.06.13

You will need:

- 147MM & 141MM CARDSTOCK (YOUR CHOSEN STOCK WILL END IN C-1 & C-3 RESPECTIVELY: WE CHOSE OUR CRYSTAL WHITE BOARD)
- 155MM X 155MM ENVELOPE: CODE WOULD BEGIN WITH ENV02. (CRYSTAL WHITE IS ENV02-2I)
- DECORATIVE PAPER (WE CHOSE 'CONSTANCE ROSA' CODE P88-2)
- SPARKLING EMBELLISHMENT - WE'VE SO MANY TO CHOOSE FROM!
- GLUES: ATG TAPE OR DOUBLE SIDED TAPE + GEM-TAC OR HOT GLUE GUN + PAPER TRIMMER/CRAFT KNIFE
- FOR THE ROSE WE NEEDED A 'PUNCH & STAMP SET CODE PL121-2'

This is a really easy invitation to make; the lined envelope makes it really special and so pretty your guests will be thrilled to receive it!

1. Firstly print your invitation information onto the 141mm cardstock allowing room for the decorative strip of paper and the embellishment.

Cut a strip approx 1.75cm wide and 17cm long of the decorative paper and, using ATG tape or double-sided tape, position on the invitation tucking the ends behind the 141mm card.

2. Run ATG tape or double sided tape around the edge of the reverse of the 141mm card and position on top of the 147mm card making sure the border around the edge is the same width (3mm).

3. Using either Gem-Tac or a hot glue gun attach the embellishment of your choice centrally on the strip of decorative paper (the embellishment shown is 'coming very soon'!).

4. To line the envelope create a template that you can use to repeatedly cut out the shape from your decorative paper. Drawing round the envelope then making it smaller all the way round will help create the best size, each envelope manufacturer is different so one template may not 'fit all'. It is not strictly necessary to have the lining going all the way down to the bottom of the envelope, just so it's at least a few centimetres below where you can see it.

Fix in place with ATG or double sided tape.

5. To create roses follow instructions in the punch set using the decorative paper!

Beautifully Impressive! x
